

AudaStation™

“The new AudaStation from Audatex is an essential part of our estimating services. Setup was fast and easy, taking only about 10 minutes with flawless customer and data migration and no network setup. Once up and running, it performed great and increased the productivity of my estimating services. The new AudaStation is by far the simplest and most user-friendly estimating system that I have ever used.”

Justin Clark, Nichols Body & Paint Inc., Roswell, GA

Powerful Estimations in a Powerful Box

AudaStation is the estimatics server solution for reliable and consistent application performance. The “plug-and-play” version of Audatex Estimating™ provides the automotive industry’s first software and hardware alternative for writing and processing estimates. AudaStation provides freedom from recurring I.T. expenses associated with traditional computer servers that support multiple software applications. The solution also provides a safe, secure way to avoid network server outages that can eat into valuable uptime and shop productivity.

Focus on Your Work, Not on Your Computer Network

Through AudaStation’s engineering and design, collision repair shops now have a dedicated estimatics server solution that helps save time and money. It requires no server hard drive upgrades, no memory upgrades and no I.T. consultant contracts. Avoid wasting time on the complexities of networking and compatibility. AudaStation can be installed in minutes—not days, and its built-in firewall provides the highest safety and security. Because AudaStation is dedicated to running only Audatex Estimating and complementary Audatex products, it operates quickly and efficiently, not only the first time, but every time.

AudaStation

NO LARGER THAN AN AVERAGE SHOEBOX, AUDASTATION WITH AUDATEX ESTIMATING IS THE COMPLETE TURN-KEY ESTIMATING SOLUTION

Features and Benefits

- **Speed** - AudaStation includes an 80-gigabyte high-speed hard drive, DVD drive, and some of the latest Intel® technology, which are all responsible for keeping your estimating solution running at optimal speeds, all day long. There is no need to worry about minimum server requirements ever again.
- **Reliability** - AudaStation is loaded with a customized version of Microsoft® Windows®, which has over 80 percent of the typical operating system and software removed. This ensures that AudaStation is only running what is absolutely necessary to keep your estimating solution running safely, securely, and reliably.
- **Ease of Use** - Two standard connections (network and power) are all you need to get your AudaStation up and running in minutes. A fully-interactive LCD display allows you to easily perform any needed functions of your AudaStation, including software or data updates.
- **Support** - AudaStation is fully supported by Audatex, which eliminates the need to call in expensive I.T. support. With a simple phone call and couple of button presses on your AudaStation, you can invite Audatex support personnel to resolve any unforeseen issues you may come across.

Requirements

- Existing computer network with internet access
- One or more workstations with Microsoft Internet Explorer®
- Standard 110-120V AC power

Dimensions

- Height: 4"
- Width: 8"
- Depth: 12"
